

Flexovit Alu program

The right choice for non-ferrous applications

From tough to cut titanium to soft copper, you will always have a perfect solution at hand for all kind of non-ferrous applications. Flexovit offers a complete pack of non-ferrous grinding, cleaning and cutting-off solutions with their new premium quality Alu wheel range.

The Flexovit Alu wheels offer users a unique combination of striking product features. They work faster with longer life – which results in lower operational costs. Loading and wheel-glazing is counteracted thanks to the special blend of grains and bond. The complete range is iron-, sulphur- and chlorine free which ensures that treated parts remain free from any contamination. The application based wheel design and the "one-at-the-time" production process result in an unparalleled operator friendliness and safety level.

Like other Flexovit products the Alu range is supported by a team of highly trained technicians. This is why Flexovit is the preferred brand for professional users of abrasive wheels.
